# RAPID ASSESSMENT OF OCCUPATIONAL THERAPY AND ICF-IA: Correspondences for Disability Certification.

## AUTHORS:

- ✓ **Director:** Lic. TO María Laura Bustingorri
- ✓ **Resident Collaborators-UBA:** Lic. TO Sol Alonso y Lic. TO Segundo Cagnoni
- ✓ **Methodologist:** Esp. Lic. TO Ada Luz Vega Barrios

## The research questions that motivate this investigation are:

1. Is there a correspondence between the data provided by the Rapid Occupational Therapy Assessment (ERTO) and the selected data from the International Classification of Functioning, Disability and Health (ICF-1A) that facilitates the interpretation of information provided by occupational therapists at the University Center for Rehabilitation and Comprehensive Care for disability certification?
2. What types of correspondences exist, and how are these data from both documents under study evidenced?

# TRANSFORMING

A PROFESSIONAL PRACTICE EXPERIENCE

into a investigation  
experience

## ERTO y ICF IA:

- **Documentary analysis**
- **SWOT Analysis**
